

NISCORT FATHER AGNEL SCHOOL, VAISHALI
SELF LEARNING WORKSHEET-7
EVS CLASS-III

Tick the correct:

1. A large amount of water is stored in nature in the form of:
a) Underground water b) Clouds c) Snow d) Oceans and seas
2. In the atmosphere, water changes into water vapour due to:
a) Sun b) Air c) Clouds d) Different gases
3. The underground water is formed from:
a) Oceans b) Rivers c) Rains d) Lakes
4. When water from the rivers turn into vapour it forms:
a) Clowns b) Clouds c) Smoke d) Snow
5. Rising of vapour to form clouds is called:
a) Condensation b) Concentration c) Evaporation d) Erosion
6. Water made dirty by washing and bathing is called _____ water:
a) Populated b) Polluted c) Clean d) None of these
7. We can clean water by:
a) Filtration b) Filming c) Fumigation d) Condensation
8. The saving of this precious liquid is called:
a) Conservation b) Conversation c) Confirmation d) Evaporation

Give an example of condensation from day-to-day life

Which form of water cannot be seen by us?

NISCORT FATHER AGNEL SCHOOL, VAISHALI
SELF LEARNING WORKSHEET-8
EVS CLASS-III

Fill in the blanks:

1. The process by which water vapour changes into liquid is called _____.
2. Water → Heat → _____ → Cool → _____.
3. The underground water is formed from _____.
4. Polluted water can spread diseases like _____ and _____.
5. Water has no _____ and _____.
6. Most of the water is found in seas and _____.

Identify the correct and incorrect use of water in the following pictures:-

Write four ways by which you can reduce air pollution in your area.

1. _____
2. _____
3. _____
4. _____

Colour and lable the water cycle
